

TENERUM DCC

DYNAMIC CURRENCY CONVERSION

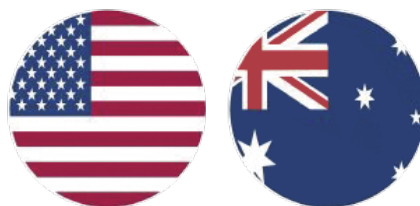

Tourists from around the globe visit the United States each year, spending money on retail, lodging, meals and other items. Tenerum Dynamic Currency Conversion makes it easy for the merchant to offer DCC in a Card Present environment, giving their international customers the choice to pay in their own currency.

Tenerum DCC goes further than any other system by presenting the customer payment currency options in their country's flag. This visual eliminates any confusion at the check-out. The traveler can finalize their payment with confidence knowing the exact amount they are paying, all while the merchant earns revenue on each transaction conversion.

DCC Transaction Flow
